

Product Name:Glass four edge grinding and washing line

Product Model: SM2500+YL-H25

Product Description:

- 1.Applicable to chamfer four edges of rectangle glassand clean.
- 2.It is the dedicated processing equipment for architectural glass, doors and windows, and insulating glass.
- 3.The man-machine interface controlling and operating system is intuitive and convenient.
- 4.Identify size, thickness,width of glass and position automatically, which makes the operation simple and convenient.
- 5.Grinding head is controlled by servo motor system to achieve efficient, highly precise, highly automatic and energy-efficient design.

Technical Parameters:

Max. width of glass	2500mm*3600mm
Min. width of glass	350X750mm
Thickness of glass	4-10mm
Grinding speed	0-25m/min
Height of table	900±20 mm
Quantity of grinding heads	2
Total power	52KW
Dimension	12000×4600×2500mm
